

WORKLORD : JOB PORTAL

Mohammed Althaf T & Anjusha BJ

August 29, 2020

INTRODUCTION

The proposed system "WORKLORD" is a web based application is to give the job seekers a platform for finding right and satisfactory job according to their qualification and skills. It also connect the job seekers with the major companies. Job portals requires features like profile management,view notifications and other filtering options for both company and users to match with the company/user with their preferred skills. There are many job portals that claims to provide you the best job , but none of them address the issues faced by the new job seekers. Most of portals give higher priority for experienced job seekers.

EXISTING SYSTEM

- Company and User registration.
- Users Upload Resume.
- Company view Userdetails.
- User Search companies and view vacancy.
