PROJECT REPORT

Submitted by

**MOHAMMED ALTHAF T**

**LKMC18MCA026**

**ANJUSHA BJ**

**KMC18MCA002**

**to**

the APJ Abdul Kalam Technological University in partial fulfillment of the requirements  
for the award of the Degree

of

*Master of Computer Applications*

**Department of Management Studies Computer Applications**

**KMCT College of Engineering**

**Kallanthode, NITC P.O, Kozhikode-673601**

AUGUST 2020

## DECLARATION

I undersigned here by declare that the project report “**WORKLORD**”, submitted for partial fulfillment of the requirements for the award of degree of Master of Computer Applications of the APJ Abdul Kalam Technological University, Kerala is a bonafide work done by me under supervision of **Mr. Ajayakumar K K**. This submission represents my ideas in my own words and where ideas or words of others have been included, I have adequately and accurately cited and referenced the original sources. I also declare that I have adhered to ethics of academic honesty and integrity and have not misrepresented or fabricated any data or idea or fact or source in my submission. I understand that any violation of the above will be a cause for disciplinary action by the institute and/or the University and can also evoke penal action from the sources which have thus not been properly cited or from whom proper permission has not been obtained. This report has not been previously formed the basis for the award of any degree.

## **CERTIFICATE**

This is to certify that the report entitled **WORKLORD** submitted by **MOHAMMED ALTHAF T** (LKMC18MCA026), **ANJUSHA BJ** (KMC18MCA002) to the APJ Abdul Kalam Technological University in partial fulfillment of the requirements for the award of the Degree of Master of Computer Applications is a bonafide record of the project work carried out by him under our guidance and supervision. This report in any form has not been submitted to any other University or Institute for any purpose.

Internal Supervisor

Project Coordinator

External Evaluator

Head Of The Dept

## ACKNOWLEDGEMENT

I would like to take this opportunity to extend my sincere thanks to people who helped me to make this project possible. This project will be incomplete without mentioning all the people who helped me to make it real.

First and foremost I thank **Dr. Ranjith C** (Principal of KMCT College of Engineering) who gave us all support to this project. I also thank Mr. Ajayakumar K K (Head of Departement, MCA) for providing all the facilities and resources for my project. I would also like to express my gratitude towards **Mrs. Sabna T.S** (Assistant Professor, MCA), Project Coordinator, for her continuous support, guidance and supervision without which the project wouldn't have been a reality. I also express my sincere gratitude to **Mr. Ajayakumar K K** (Head of Departement, MCA), Project Guide, for her valuable guidance and inspiration throughout my work. I would also take this opportunity to thank all my friends who took time out of their busy schedule to encourage, support and motivate us which has been the key reason for the successful completion of this project.

Above all I thank God, the almighty for his grace without which it would not have been possible to complete this work in time.

## **ABSTRACT**

Technology has changed the way job seekers search for jobs and employers find qualified employees. While employers still advertise job openings through traditional advertising mediums, today employers and job seekers turn to online job portals to find employment matches. Job seekers can advertise their skills and search for available positions and employers can announce employment openings through job portals.

The proposed system "WORK LORD" is a web based application to give the job seekers a platform for finding right and satisfactory job according to their qualification and skills. It also connect the job seekers with the major companies. This application is mainly focused on the applicants, who are seeking jobs in CS (Computer Science) field. Job seekers can register themselves with resume at the website where as the employers register in the website and put job vacancies at their company. Employers can also browse through the posted resumes and user performance. The system provides jobs catalogue and information to members. The Admin and employers can keep the catalogue updated all the time so that the job seekers get the updated information all the time.

There are many job portals that claims to provide you the best job, but none of them address the issues faced by the job seekers. They face issues because of work experience, because Companies give more priority for experienced job seekers. And they are not calculating the skill level of the job seekers. In this project we provide the Job Seeker to express their skills by completing the tests provided by admin which helps employer to understand their skills in their fields easily. Also they will be getting tasks to complete for measuring their performance. Most scored/skilled persons will be highlighted top and gets faster job opportunities such as preferred employer, preferred technology should be there. Calculating skills will be a great option for freshers to seek jobs. The issues faced by freshers can solved by implementing these features in the web application. The priority based opportunities can be avoided by this. In our project we will be focusing on changing such attitude towards freshers.

# Chapter 1

## INTRODUCTION

The quality of people hired for a specific job is usually the key issue when measuring the effectiveness of the employment. However, in certain circumstances the speed of hiring is also an issue and also contribute to quality hiring. The rationale of a hiring process is to stretch out to potential employees and bring out the specific kind of required skills and experiences in the field organization. Online job portal system is fundamental in removal of paper works and introduction of workflow systems that connect job seekers and employers. At a very low cost, the internet offers employers and job searchers access to detailed and up-to-date information about job vacancies in different locations around the world.

WORKLORD project is aimed at developing a job portal friendly for non-experienced and experienced job seekers. The system project is an online web application which can be accessed from anywhere only with a proper login verification. Job seekers should be able to login and upload their resume and update their contact details. There are many job portals that claims to provide you the best job, but none of them address the real issues faced by the non-experienced job seekers. Companies give higher priority for experienced job seekers. They failes calculate the skill level of the job seekers.

In this project we insist the Job Seeker to complete specific tests provided by the admin which helps employer to understand job seeker's skills and performance in their fields. Also they will be getting tasks to express their performance and efficiency. Most scored/skilled persons will be getting more priorities, Options such as top scored candidate, preferred employer, preferred technology should be there. Calculating skills will be a great option for freshers to seek jobs. The issues faced by the new job seekers to find a perfect job with their skills is difficult. In our project we will try to change such attitude from companies towards freshers. This system gives the company to search for the best candidate available on the fields.

# Chapter 2

## LITERATURE SURVEY

### 2.0.1 Job Procurement

Old and New Ways Job seeking usually involves different ways to look for jobs such as through personal contacts, direct telephone calls to employers, job agency office, scanning online job listings etc. Before the Internet, became widely uses as a method of seeking jobs, jobseekers spent a lot of time using various methods to look for job openings. Today, jobseekers use online methods which are very convenient and save a lot of time. Eleanna Galanaki lists the following methods to be the traditional (old) ways for recruitment:

- Employment recruitment agencies
- Job fairs
- Advertising in the mass media such as newspapers
- Advertisement in television and radio
- Management Consultants
- Existing employee contacts
- Schools colleges or universities students services department
- Workers or professional referrals

These old job seeking methods are too slow, stressful, challenging and also lack quality. In addition, the applicants have to consider the cost and the amount of time to get the information they need, and other preparations they have to make. Finding all available job vacancies is a main step at in the job-seeking process. The Internet is now a powerful tool that jobseekers can use. Today, there are many sites that advertise job positions to be filled by people with certain skills in various fields. The Internet plays an important role in the area of human resource planning and development. Most organizations are now using computer technology and the Internet for staff recruitment. Although the Internet has facilitated the process of job-seeking, it has not replaced the traditional methods, completely.

## **2.0.2 Importance of Job Portals**

In the age of technology, the Internet has become the main source of information for jobseekers. Large corporations, institutions, and universities include information on career prospects on their websites. According to a survey, 70% of the workforce uses websites or portals on the Internet to search for jobs in France. These websites or portals provide a search engine to access information on job opportunities. The most employers are keen to use online recruitment methods of getting staff. It mentions that the online recruitment methods have the ability to identify the best applicants. That is the reason why more developed countries such as Malaysia have started to use online job portal as one of the important way to recruit people to fill job vacancies. A study done in 2006, found that 21% of internet users in the EU used the web to search for jobs or to send job applications. In 2007, this had increased to 67% for unemployed people.

## **2.0.3 Features of Job Portals**

One of the ways to improve employment mobility is to provide online job offer services. Online job portals can help jobseekers as they contain all required information about available vacancies in a single point. Such portals enhance efficiency in job recruitment as applicants can match their qualifications and skills to the requirements of employers. Generally, searching for jobs on the internet involves a process of information collecting because the job seeker gathers information contained in the job portals, during the search. A good job portal shares information and experiences with its members/users. This save time and efforts and better decisions can be made. Job openings requirements can be matched to an applicant's qualification and skills. In this way, job portals return not only the precise matches but also return the most similar match. The members of the European Commission (EC) stated that online job portals should have quite similar characteristics that include an online searchable database of positions for job searcher, facilities to send CVs to the website, email alerts of jobs which match the users profile, extra instruction, for example, about working in foreign countries or career guidance, the capability to manage job applications, employers must have the ability to publish and manage job positions, search the CV database, and have online contact with potential jobseekers.

# Chapter 3

## SYSTEM ANALYSIS

### 3.1 Existing system

The traditional hiring of employees starts with the processing of application forms, describe the job for each position, verify application forms and lastly evaluate the best person for the job. The whole process from advertisement to hiring a quality applicant takes a lot of time, effort and also has more weakness. The advertisement itself is costly especially when done through print media. therefore, the publication of the job adverts will only last for a very short time and in that case few people will have seen the job vacancy. Thus, the traditional recruitment process is not be the best in today's competitive job market.

The question here is how this could be made efficient and possible. This question or problem solved by an online job portal system which is set to transform the way in which companies and other employers recruit their employees. The Job seeker Functions concentrates on the consistent information that is practically, part of the organizational activities and which needs proper authentication for the data collection. The users can perform some tasks without registering or without entering into the application. He can search for the jobs in the site. He can view the information which is available for the job seekers. Also view the walk-in details. The job seeker can perform some tasks only after entering into the application. In any situation the job seeker needs to change his password then he can change on his own. He can view the details of his own profile and he can modify his details in his profile. The employer can view his own profile and they can also post new job vacancies and they can view the candidates resumes applied for jobs. The admin functions concentrates on maintain the functionality of site. Proper management of complete job seeker section and employer section is his responsibility.

## 3.2 Proposed system

The proposed system "WORKLORD" is a web based application is to give the job seekers a platform for finding right and satisfactory job according to their qualification and skills. It also connect the job seekers with the major companies. Job Portal is a platform that joins recruiters and the job seekers to complete their goals and requirements. Recruiters look for a right candidate who has the right qualification to handle the responsibilities efficiently. On the other hand, job seekers want a job where they can apply their skills and knowledge to grow their professional career. Most of the jobseekers who're actively seeking new employment opportunities are believed to be registered on multiple job portals. Finding a job opportunity per your choice and qualification through a job portal is relatively easier. There are many job portals that claims to provide you the best job, but none of them address the issues faced by the new job seekers. Most of portals give higher priority for experienced job seekers.

Job portals requires features like profile management, view notifications and other filtering options to match with the company with their skills. The users can perform some tasks without registering like he can search for the job vacancies, walk-in details which available in the notifications section. The job seeker can perform some tasks only after registration. After registering he can attend for tests and complete tasks. He can also view and modify his profile and also he can change his password. The employer can view their profile and they can post new job vacancies. They can also view the candidates resumes applied for jobs. The admin functions concentrates on maintaining the functionality of site. Proper management of complete job seeker section and employer section is his responsibility. He also provides tasks and updates test datas. Users analytics shows you a compiled listing of all users and the time they have spent using their Skills. Users analytics is one of the more important analytics sets when they are trying to calculate skills relating to an individual. We can check into a particular individual's performance and see how they are performing. Many companies prefer employees with good experiences and reputation in their previous job rather than freshers. This causes issues with finding jobs for freshers with right skills. In this project we will be trying to change such attitude towards freshers. This system facilitate the company to search for the best candidate available and employ them as employers to improve efficiency on the employment sector.

## **3.3 Module Description**

### **3.3.1 User**

- Search for Job Posts
- Apply Online for Job Posts
- Attend Exams in the website
- Complete Tasks
- Update Profile and Resume
- Send Reply to Applied Job's Company
- View Application's Status
- View Scores in Exams and Task

### **3.3.2 Company**

- Add Job Posts
- Review Applications
- Download Applicant's Resume
- Contact Applicant
- View Messages from User
- View Exams and Task Scores

### **3.3.3 Admin**

- Manage Active Jobs
- Manage Users
- Manage Companies
- Add Exams and Update Questions
- Add Tasks
- Review Task
- View Task/Exam Scores

## **3.4 Feasibility Study**

### **3.4.1 Operational Feasibility**

This Project is beneficial to people who wants to meet the qualifications of theirs and company's requirements. There's not much difficulty in, implementing the proposed system, It is so more effective, user friendly and functionally reliable to everyone. WORK-LORD job portal is beneficial for every new job seekers, They can access this web portal from any where. This website can be accessed from any devices like laptop or smartphone with internet connection. Any of the user with good internet connection can register the website and complete tests and wait for right company to pick them up, users can make use of this portal by completing tasks which improves their skills.

### **3.4.2 Technical Feasibility**

Technical Feasibility study deals with the hardware as well as software requirements. We have to determine whether the project done with the current technology has been examined in the feasibility study. The proposed system requires software like gedit and web server solution application called Xampp both are available for free. The website can also be easily upgraded to the higher level with less effort and maintenance. This website can be easily accessed with user's smartphone from anywhere with internet connection and portal is very much user friendly. Hence the Proposed system is technically feasible.

### **3.4.3 Economic Feasibility**

Economic feasibility determines whether the proposed system is capable of generating profit for an organization. It involves cost incurred on the development team, estimated cost of hardware and cost of performing feasibility study and so on, this website was developed with the available resources. Since cost of input for the system is almost zero. The output of the website is always a profit for the user and we see this as a service. This website doesn't cost any charge from the job seeker who is accessing it. Since the website can be accessed from any device with internet connection there is no need for a specific hardware. Hence it is economically feasible.

## **3.5 System Environment**

- Back-end : PHP,MYSQL(Database)
- Front-end : Javascript,Bootstrap,Html,CSS

### **3.5.1 Minimum Requirements (User)**

- Computer/Laptop/Mobile
- Any OS with Updated Browser
- Stable Internet Access

### **3.5.2 Minimum Requirements (Developer)**

- Processor : Intel Pentium/Celeron or newer
- Memory : 2 GB RAM
- Storage : 20 GB HDD/SSD (Recommended)
- Operating System : Linux
- Text Editor : Gedit
- Web server solution : Xampp
- Browser : Chrome
- Other Utils : Git
- Stable Internet Access

## **3.6 Actor and Their Roles**

### **3.6.1 User**

- Register
- Login
- Attend Tests
- Complete Task
- Edit User details
- Apply for Jobs
- Reply Messages from Company
- View Scores

### **3.6.2 Company**

- Register
- Login
- Edit Company details
- View qualified users
- Add Job Posts
- Review Job Applications
- Download Resumes
- Send Messages to Applicants

### **3.6.3 Admin**

- Login
- View/Edit Users
- Approve Companies
- View/Edit Jobs
- Add Exams and Update Questions
- Add New Tasks
- Review Tasks

# **Chapter 4**

## **METHODOLOGY**

### **4.1 Introduction**

This project follows Agile methodology. Agile software development comprises various approaches to software development under which requirements and solutions evolve through the collaborative effort of self organizing and cross-sectional teams and their customers/end users. It advocates adaptive planning, evolutionary development, early delivery and continuous improvement and it encourage rapid and flexible response to change.

## 4.2 UML Diagrams

### 4.2.1 Activity Diagram

- USER

## - ADMIN

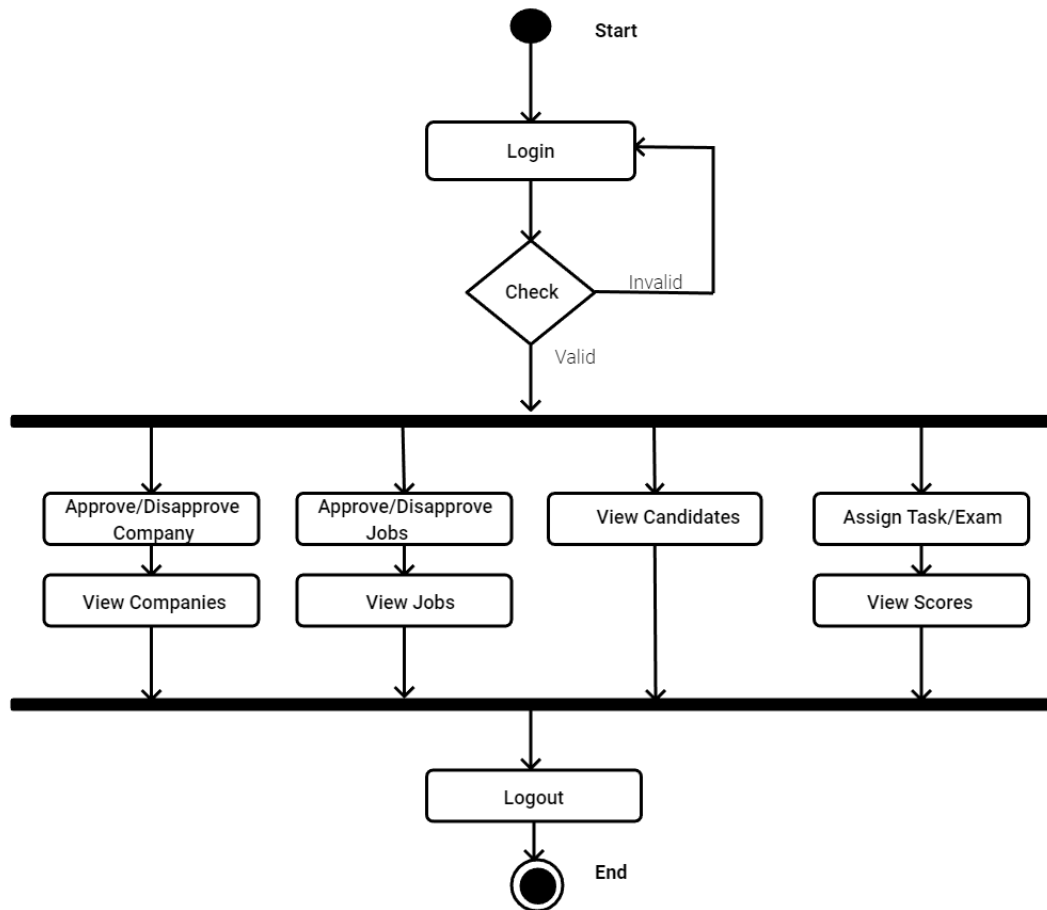

Figure 4.3: Admin's Activity Diagram

## 4.2.2 UseCase Diagrams

Figure 4.4: UseCase Diagram

### 4.3 User Story

User story ID	As a <Type of Users>	I want to <Perform some task>	So that I can <Achieve some goal >
1	Admin/User/Company	Home Page	Go to other activities
2	User/Company	Registration	Access the system
3	Admin/User/Company	Login	Access the system
4	Admin	View companies	View companies
5	Admin	Approve,Disapprove company	Manage companies
6	Company	Post jobs	Add Job vaccancies
7	Admin	View jobs, Delete Jobs	Manage jobs
8	User	Search jobs, View jobs, Apply job, View job applications	Search jobs, View jobs, Apply job, View job applications
9	Company	View posted jobs	Manage posted jobs
10	Company	View applications, Download Resumes	View job applications, Download Resumes
11	Admin	Create exams, Add questions	Create exams, Add questions
12	Admin	Create tasks	Create tasks
13	User	Attend exam	Attend exam
14	Admin	View candidates	View candidates
15	User	Attend task	Attend task
16	Admin/User/Company	View exam, task scores	Understand knowledge, skills of candidates
17	User/Company	Send and Receive Messages	Send/Receive Messages
18	User/Company	Manage account	Update Profile,Change Password

Figure 4.5: User Story

## 4.4 Product Backlog

USER STORY ID	PRIORITY (LOW,HIGH, MEDIUM)	SIZE	SPRINT	STATUS (PLANNED, PRO-GRESSED, COM-PLETED)	RELEASE DATE	RELEASE GOAL
1	HIGH	8	1	Completed	15-09-2020	Login to the sys-tem
2	HIGH	7		Completed	18-09-2020	Access the sys-tem
3	HIGH	8		Completed	20-09-2020	Access the ac-count
4	MEDIUM	8		Completed	23-09-2020	View companies
5	HIGH	5		Completed	27-09-2020	Manage compa-nies
6	HIGH	7	2	Completed	30-09-2020	Add job vac-canices
7	HIGH	6		Completed	04-10-2020	Manage jobs
8	MEDIUM	10		Completed	10-10-2020	Search jobs,View jobs,Apply job,View job applications
9	HIGH	6		Completed	11-10-2020	Manage posted jobs
10	HIGH	9	3	Completed	14-10-2020	View applica-tions,Download Resumes
11	MEDIUM	6		Completed	19-10-2020	Create ex-ams,Add ques-tions
12	HIGH	6		Completed	22-10-2020	Create tasks
13	MEDIUM	6		Completed	26-10-2020	Attend exams

<b>USER STORY ID</b>	<b>PRIORITY (LOW,HIGH, MEDIUM)</b>	<b>SIZE</b>	<b>SPRINT</b>	<b>STATUS (PLANNED, PRO- GRESSED, COM- PLETED)</b>	<b>RELEASE DATE</b>	<b>RELEASE GOAL</b>
14	MEDIUM	10	4	Completed	28-10-2020	View Candi- dates
15	HIGH	10		Completed	31-10-2020	Attend task
16	MEDIUM	7		Completed	02-11-2020	Understand knowledge, skills of candi- dates
17	HIGH	8		Completed	05-11-2020	Send/Receive Messages
18	HIGH	8		Completed	08-11-2020	Update Profile, Change pass- word

## 4.8 Database Design

### 4.8.1 Login Table

Both users and company can access their account only after login in to the system with proper username and password. This Table stores username and password of both users and company who registered in the website.

No.	FIELD NAME	TYPE	CONSTRAINTS	DESCRIPTION
1	loginid	INT(3)	PRIMARY KEY	User's ID
2	email	VARCHAR(30)	UNIQUE	User's Email
3	password	VARCHAR(20)	NOTNULL	User's Password
4	role	VARCHAR(10)	NOTNULL	Usertype

Table 4.1: Login Table

### 4.8.2 Company Table

Any companies can get the functionality of the system only after their registration. This Table stores Company details uploaded at the time of registration.

No.	FIELD NAME	TYPE	CONSTRAINTS	DESCRIPTION
1	companyid	INT(11)	PRIMARY KEY	Company ID
2	name	VARCHAR(50)	NOTNULL	Employer's Name
3	companyname	VARCHAR(50)	NOTNULL	Company Name
4	country	VARCHAR(50)	NOTNULL	Company Country
5	state	VARCHAR(10)	NOTNULL	Company State
6	city	VARCHAR(50)	NOTNULL	Company City
7	contactno	VARCHAR(50)	NOTNULL	Company Phone Number
8	website	VARCHAR(50)	NOTNULL	Company Website
9	email	VARCHAR(50)	UNIQUE	Company's Email
10	aboutme	VARCHAR(100)	NOTNULL	About Company
11	logo	VARCHAR(100)	NOTNULL	Company Logo Name
12	active	INT(2)	NOTNULL	Account Status

Table 4.2: Company Table

### 4.8.3 User Table

Any users can get the functionality of the system only after their registration. This Table stores details of Users uploaded at the time of registration.

No.	FIELD NAME	TYPE	CONSTRAINTS	DESCRIPTION
1	userid	INT(11)	PRIMARY KEY	User's ID

Table 4.7: Job Post Table

#### 4.8.8 Job Apply Table

Users can view the job vacancies posted by different companies and they can apply for jobs according to their interest. This Table stores Applied User's details and status of Application

No.	FIELD NAME	TYPE	CONSTRAINTS	DESCRIPTION
1	applyid	INT(3)	PRIMARY KEY	Job Application Apply ID
2	jobpostid	INT(3)	FOREIGN KEY	Job Post ID
3	companyid	INT(3)	FOREIGN KEY	Company ID
4	userid	INT(3)	FOREIGN KEY	User's ID
5	status	INT(3)	NOTNULL	Application Status

Table 4.8: Job Apply Table

#### 4.8.9 Exams Table

Admin conduct exams for candidates to know their knowledge. Admin create exams and this Table stores that Exam details.

No.	FIELD NAME	TYPE	CONSTRAINTS	DESCRIPTION
1	examid	INT(3)	PRIMARY KEY	Exam ID
2	examname	VARCHAR(30)	NOTNULL	Exam Name
3	duration	INT(3)	NOTNULL	Exam Duration
4	passmark	INT(5)	NOTNULL	Exam Passmark
5	terms	VARCHAR(150)	NOTNULL	Exam Terms

Table 4.9: Exams Table

#### 4.8.10 Exam Questions Table

Admin conduct exams for candidates to know their knowledge, so admin need to be add and update questions. This table stores the questions for each exams.

No.	FIELD NAME	TYPE	CONSTRAINTS	DESCRIPTION
1	questionid	INT(3)	PRIMARY KEY	Question ID
2	examid	VARCHAR(15)	FOREIGN KEY	Exam ID
3	type	VARCHAR(50)	NOTNULL	Question Category
4	question	LONGTEXT	NOTNULL	Question
5	option1	VARCHAR(50)	NOTNULL	Question Option 1
6	option2	VARCHAR(50)	NOTNULL	Question Option 2
7	option3	VARCHAR(50)	NOTNULL	Question Option 3
8	option4	VARCHAR(50)	NOTNULL	Question Option 4
9	answer	VARCHAR(50)	NOTNULL	Question Answer

Table 4.10: Exam Questions Table

#### 4.8.11 Assessment Record Table

Each candidates should attend the exam assigned by the admin and the exam score can be view by the admin,company and user.This table store exam scores of each candidates.

No.	FIELD NAME	TYPE	CONSTRAINTS	DESCRIPTION
1	recordid	INT(3)	PRIMARY KEY	Record ID
2	userid	INT(3)	FOREIGN KEY	User's ID
3	examid	VARCHAR(20)	FOREIGN KEY	Exam ID
4	score	INT(5)	NOTNULL	User's Score
5	status	INT(2)	NOTNULL	Result Status
6	date	DATE	NOTNULL	Exam Date

Table 4.11: Assessment Record Table

#### 4.8.12 Task Table

Admin assign different tasks for candidates to know their skills. This table store task details that assigned by admin for candidates.

No.	FIELD NAME	TYPE	CONSTRAINTS	DESCRIPTION
1	taskid	INT(3)	PRIMARY KEY	Task ID
2	taskname	VARCHAR(50)	NOTNULL	Task Name
3	question	VARCHAR(500)	NOTNULL	Question
4	passmark	INT(3))	NOTNULL	Pass Mark
5	terms	LONGTEXT	NOTNULL	Task Details
6	status	INT(2)	NOTNULL	Task Status

Table 4.12: Task Table

#### 4.8.13 Task Submit Table

Each candidate responsible for complete the task assigned for them. This table stores candidates's submitted task details, status and scores.

No.	FIELD NAME	TYPE	CONSTRAINTS	DESCRIPTION
1	taskid	INT(3)	PRIMARY KEY	Task ID
2	userid	INT(3)	FOREIGN KEY	Candidate ID
3	tasksubmitdate	DATE	NOTNULL	Task Submit Date
4	tasksubmitstatus	INT(5)	NOTNULL	Task Submit Status
5	taskreviewstatus	INT(5)	NOTNULL	Task Review Status
6	tasklink	VARCHAR(200)	NOTNULL	Task Github Link
7	taskscore	INT(10)	NOTNULL	Task Status

Table 4.13: Tasks Submit Table

#### 4.8.14 MailBox

There is an option to make communication between user and company. This Table stores Mail details that is to be send/receive from user/company.

No.	FIELD NAME	TYPE	CONSTRAINTS	DESCRIPTION
1	idmailbox	INT(3)	PRIMARY KEY	Mail ID
2	idfromuser	INT(3)	NOTNULL	ID of user send message
3	fromuser	VARCHAR(10)	NOTNULL	Type of user who send
4	idtouser	INT(3)	NOTNULL	The id of user to be send
5	subject	VARCHAR(100)	NOTNULL	Message subject
6	message	VARCHAR(300)	NOTNULL	Message
7	date	DATE	NOTNULL	Date of message creation

Table 4.14: MailBox Table

#### 4.8.15 Reply MailBox

There is an option to make communication between user and company. This Table stores Mail details that is to be send/receive from user/company.

No.	FIELD NAME	TYPE	CONSTRAINTS	DESCRIPTION
1	idreply	INT(3)	PRIMARY KEY	ID of reply message
2	idmailbox	INT(3)	FOREIGN KEY	Mail ID
3	iduser	VARCHAR(10)	FOREIGN KEY	ID of user
4	usertype	INT(3)	FOREIGN KEY	Type of user
6	message	VARCHAR(300)	NOTNULL	Message
7	date	DATE	NOTNULL	Date of message creation

## 4.9 User Interface Design

### 4.9.1 Homepage

Homepage of Worklord Website

The screenshot shows the homepage of the 'WORKLORD' website. At the top, there is a header bar with the site name 'WORKLORD' on the left and 'Signup Login' on the right. Below the header, the main content area features the tagline 'All JOBS In One Place' and 'One search, global reach' centered. A 'Search' button is positioned below the tagline. Further down, a section titled 'Latest Jobs' displays two job listings. Each listing includes a circular 'LOGO' placeholder, the job title and qualifications, and the salary/month.

Latest Jobs		
LOGO	Job Title Qualifications	Salary/Month
LOGO	Job Title Qualifications	Salary/Month

Figure 4.17: Homepage

### 4.9.2 Login

Login Page for admin,company and users

The screenshot shows a login window titled 'Login'. It contains two input fields: 'User Name' with the placeholder text 'Enter Your User Name' and 'Password' with the placeholder text 'Enter Your Password'. Below these fields is a 'Login' button.

Login	
User Name	Enter Your User Name
Password	Enter Your Password
Login	

Figure 4.18: Login

### 4.9.3 Job Search

Helps to Search Available Jobs in the website

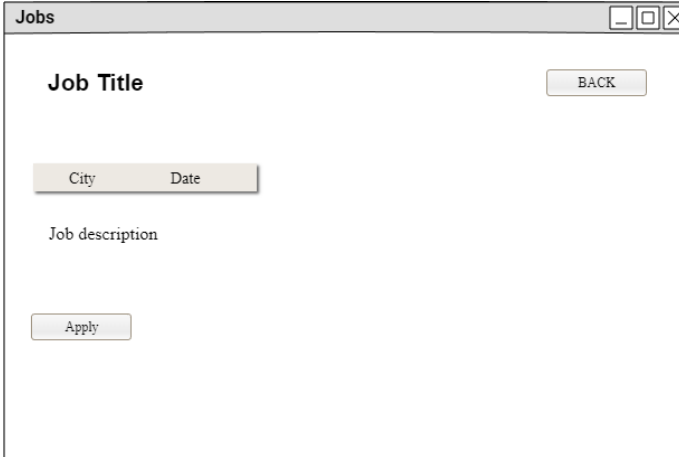

A window titled "Jobs" with a search interface. The window has a title bar with standard minimize, maximize, and close buttons. The main content area is titled "Latest Jobs" in bold. Below the title is a search bar with the placeholder text "Search job" and a "Go!" button to its right.

Figure 4.19: Job Search

### 4.9.4 Jobs

Job Details

A window titled "Jobs" displaying job details. The window has a title bar with standard minimize, maximize, and close buttons. The main content area is titled "Job Title" in bold. To the right of the title is a "BACK" button. Below the title is a table with two columns: "City" and "Date". Below the table is the text "Job description". At the bottom left is an "Apply" button.

Figure 4.20: Jobs

## 4.9.5 Mailbox

View messages from User/Company and Compose messages to User/Company

Figure 4.21: MailBox

## 4.9.6 View Mailbox

View messages from User/Company and Reply to those messages

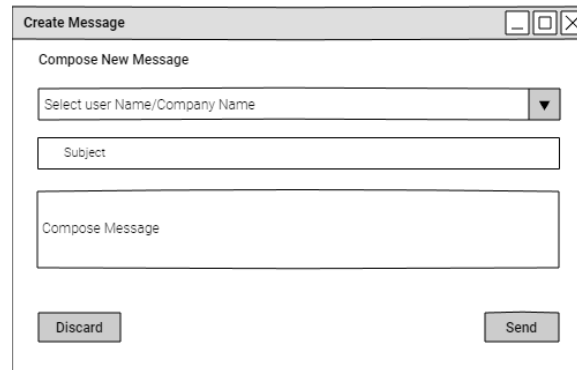

Figure 4.22: View MailBox

## 4.9.7 Compose Message

Compose Messages to User or Company (Shows users Applied for Jobs)

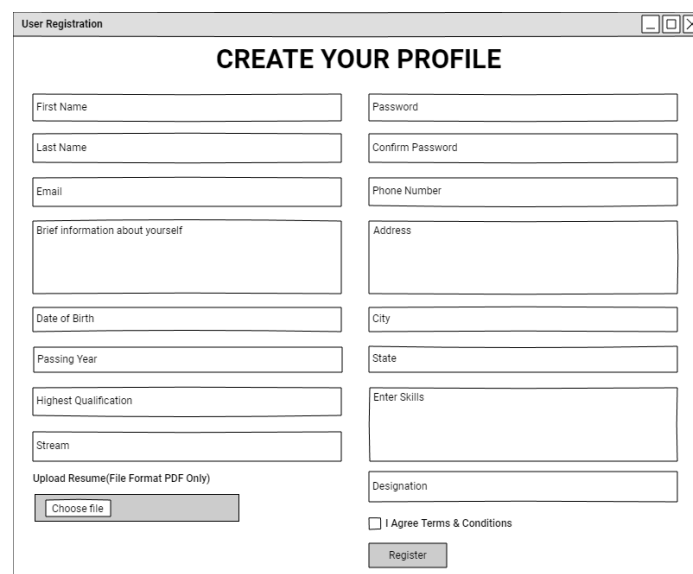

The 'Create Message' dialog box features a title bar with standard window controls. The main area is titled 'Compose New Message' and contains a dropdown menu for 'Select user Name/Company Name', a 'Subject' text field, and a larger 'Compose Message' text area. At the bottom, there are 'Discard' and 'Send' buttons.

Figure 4.23: Compose Message

## 4.9.8 User Registration

Registration form for User

The 'User Registration' form, titled 'CREATE YOUR PROFILE', is organized into two columns. The left column includes fields for First Name, Last Name, Email, a text area for 'Brief information about yourself', Date of Birth, Passing Year, Highest Qualification, and Stream. The right column includes fields for Password, Confirm Password, Phone Number, Address, City, State, Enter Skills, and Designation. At the bottom left, there is a section for 'Upload Resume(File Format PDF Only)' with a 'Choose file' button. At the bottom right, there is a checkbox for 'I Agree Terms & Conditions' and a 'Register' button.

## 4.9.11 Update Profile

Update User's Details and Resume

The 'User Update Profile' window contains an 'Edit Profile' section with the following fields:

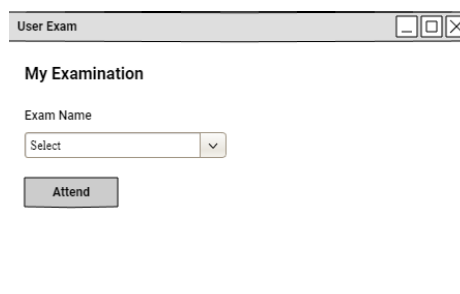

- First Name
- Last Name
- Email Address
- Address
- City
- State
- Phone Number
- Highest Qualification
- Stream
- Skills
- About Me

At the bottom, there is an 'Update Profile' button and an 'Update/Change Resume' section with a 'Choose File' button.

Figure 4.27: Update Profile

## 4.9.12 Exams

Attend Exams and View scores

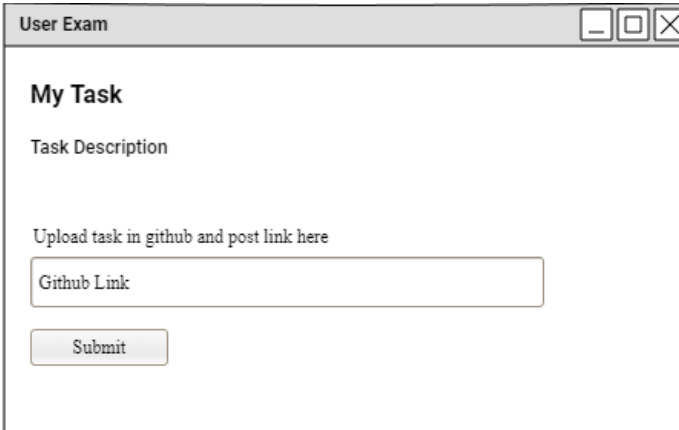

The 'User Exam' window contains a 'My Examination' section with the following elements:

- Exam Name: A dropdown menu with 'Select' as the current value.
- Attend: A button.

Figure 4.28: Exams

### 4.9.13 Tasks

Attend Tasks

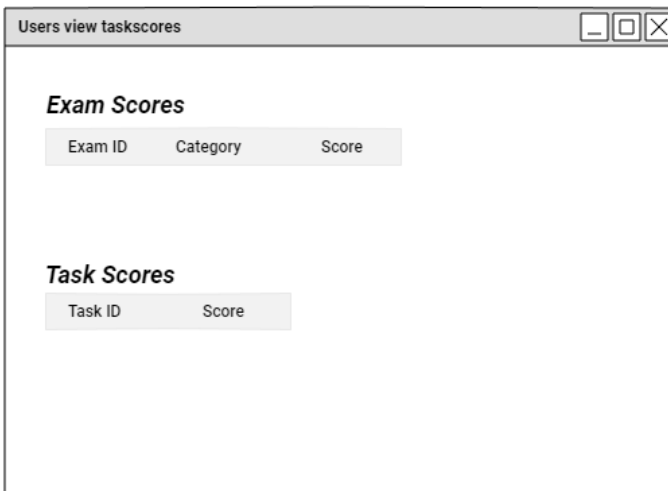

The image shows a window titled "User Exam". Inside, there is a section titled "My Task". Below this, the text "Task Description" is followed by a large text area containing the instruction "Upload task in github and post link here". Below the text area is a text input field labeled "Github Link". At the bottom of the form is a "Submit" button.

Figure 4.29: Tasks

### 4.9.14 Results

View Scores for Task and Exams

The image shows a window titled "Users view taskscores". It contains two sections: "Exam Scores" and "Task Scores". Each section has a table with columns for ID, Category, and Score.

Exam Scores		
Exam ID	Category	Score

  

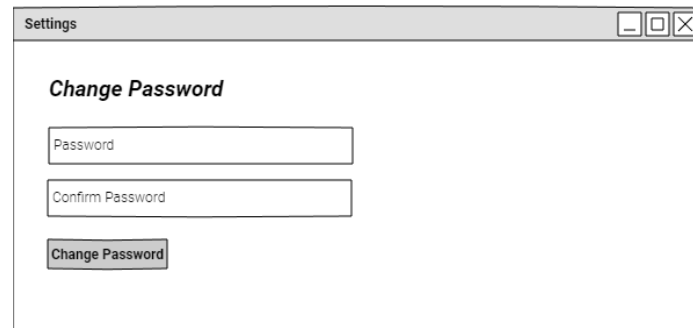

Task Scores	
Task ID	Score

## Chapter 5

# TESTING AND IMPLEMENTATION

### 5.1 Testing

#### 5.1.1 Test Case - 1

No.	Date	Action	Expected Result	Actual Result	Pass?
1	15-09-2020	Home page	Admin/ Company/ Candidates can view the type of services.	Admin/ Company/ Candidates can view the type of services.	Yes
2	18-09-2020	Registration	Company/ Candidates should be able to register into the System	Company/ Candidates should be able to register into the System	Yes
3	20-09-2020	Login	Users of the system can able to login to the system	Users of the system can able to login to the system	Yes
4	23-09-2020	View companies	Admin can view the companies register in the system	Admin can view the companies register in the system	Yes
5	27-09-2020	Approve/ Disapprove Company	Admin can approve or reject or reactivate company registration	Admin can approve or reject or reactivate company registration	Yes

Table 5.1: Test Case - 1

### 5.1.2 Test Case - 2

No.	Date	Action	Expected Result	Actual Result	Pass?
6	30-09-2020	Post Jobs	Employer can post job vacancies in their company	Employer can post job vacancies in their company.	Yes
7	04-10-2020	View and Delete Jobs	Admin can view and delete job post	Admin can view and delete job post	Yes
8	10-10-2020	Search, view, apply jobs and view applied job applications	Users can view, search and apply for jobs and also view their applied job applications	Users can view, search and apply for jobs and also view their applied job applications	Yes
9	11-10-2020	View Posted Jobs	Companies can view and delete their posted job vacancies	Companies can view and delete their posted job vacancies	Yes

Table 5.2: Test Case - 2

### 5.1.3 Test Case - 3

No.	Date	Action	Expected Result	Actual Result	Pass?
10	14-10-2020	View Job Applications And Download resumes	Employer can view job application for their job post applied by different candidates and also employer can download their resumes.	Employer can view job application for their job post applied by different candidates and also employer can download their resumes.	Yes
11	19-10-2020	Create Exams	Admin can create exam, add questions and also manage created exams.	Admin can create exam, add questions and also manage created exams	Yes
12	22-10-2020	Create Tasks	Admin can create Tasks, add questions and also manage created tasks	Admin can create Tasks, add questions and also manage created tasks.	Yes
13	30-10-2020	Attend Exam	User can attend exams.	User can attend exams.	Yes

Table 5.3: Test Case - 3

#### 5.1.4 Test Case - 4

No.	Date	Action	Expected Result	Actual Result	Pass?
14	31-10-2020	View candidates	Admin can view registered candidates details.	Admin can view registered candidates details.	Yes
15	04-11-2020	Attend Task	User can submit task	User can submit task	Yes
16	11-11-2020	View Exam, Task Scores, Review tasks	Admin/ user/ company can view candidate's exam and task scores.	Admin/ user/ company can view candidate's exam and task scores.	Yes
17	13-11-2020	Send/ Receive Messages	user/ company can send or receive messages.	user/ company can send or receive messages.	Yes
18	15-11-2020	Update profile and change password	User/ company can update their profile and can change password.	User/ company can update their profile and can change password.	Yes

Table 5.4: Test Case - 4

## 5.2 Implementation

After testing, the proposed system is ready for the implementation. Implementation is the stage of the project when the theoretical design is turned in to a working system. Implementation is the process of bringing a newly developed system or revised into operational one. The new system and its components are to be tested in a structured and planned manner. The implementation stage of a project is often very complex and time consuming and many more people are involved in the earlier stages. This involves careful planning, investigation of the current system and constraints of implementation, installing hardware, training the operating users in the changeover procedures before the system is setup and running. So, proposed system is easy to implement. It would be very easy to run also.

While implementing this system we only have few challenges. First challenge is to provide access to this webpage from anywhere or any device with internet access. For that we had to host the webpage in server with database access. If number users increase in this situation it won't affect as much as hosting in a local server. Most Hosting Providers have highly capable bandwidth and powerful computer to handle such traffic. The user must have a device with browser and stable internet access. Rest of the challenges are depended on the user, knowledge about using an electronic device and using it for accessing website.
